

WORKBOOK UNIT 2 - PEOPLE

nal. 1

This is one big happy family. There are nine people in the picture: eight ladies from different parts of the world and a girl. They are not relatives. They are a part of an international project. The family lives in a beautiful house in China. The house is on the edge of a forest. It is unusual because of its carved roof. From the balcony there is a wonderful view of the Chinese countryside.

nal. 16 b

Bullying is aggressive behavior among **school** children. It often happens more than once. It hurts you physically and it hurts your **feelings**. The person who bullies is called a **bully**. Bullying is done on purpose and it's not a joke or an **accident**. For example, if someone hurts you during a football game by accident that is not bullying. If they **hurt** you every time you play football, that is bullying.

There are different **types** of bullying. Verbal bullying is when somebody calls you **names**, makes inappropriate comments, threatens you, says and writes **mean** things to you or about you. Social bullying is when someone **leaves** you out on purpose, tells others not to be friends with you anymore or **gossips** about you. Physical bullying is when someone kicks or punches you, pushes you around, takes or **breaks** your things. And there's cyber bullying which is bullying using electronic technology, for example mean text messages or emails, rumors sent by email or posted on social networking sites, and embarrassing **pictures**, videos, websites, or fake profiles.

Nobody should be mean to others. Treat everyone with **respect**. Stop and think before you say or do something that could hurt someone. If you have bullied someone in the past, apologize. You will **feel** better.

If you are bullied, look at the kid bullying you and tell them to stop. If you can't, **walk** away and find an adult to stop the bullying. Stay away from places where bullying happens.

If you see bullying, talk to a parent, teacher, or another adult you **trust**. Adults need to know when bad things happen so they can help. If you don't say **anything**, the bully will think it is OK to bully.

Always remember: nobody deserves to be bullied. EVER.

nal. 21

Each year during the cold months, millions of people **around** the world become ill. Their head and their body **ache**. One minute they are hot and the next minute they are cold. Their throat hurts and they are starting to **cough**. It's 'flu season'!
The flu (short for influenza) is an illness caused by viruses that infect the nose, throat, and lungs. People of all **ages** can get the flu, but it is more common with children.
The flu has many signs (symptoms), and the most common ones are: headache, sore throat, fever, chills, muscle aches, stuffy nose, dry cough and the **feeling** of being very tired.
You can get the flu virus when someone who already has it speaks to you. This is because the virus **spreads** through the air. You often get the flu when a person who has the virus sneezes or **coughs** in your face. You can even get it by touching or/and sharing things with infected people, especially if you don't wash your hands before eating. This is why a lot of children get flu at **school**.
When you get the flu, the best thing to do is to **stay** at home and in bed. You should drink a lot of tea or water. Most people get well again in one or two **weeks** and on their own. Call the doctor if the flu is getting worse and not **better**, if you have a

really high fever, have trouble breathing or any other health problems (medical conditions).

Remember: You can **fight** the flu by keeping your immune system strong. Get enough sleep, eat healthy food, drink a lot of water and exercise regularly.
